About West Mountain

West Mountain is an established Canadian environmental solutions company specializing in the thermal treatment of a variety of hazardous and non-hazardous waste streams. Through its subsidiaries it employs a unique indirectly heated, closed loop technology that allows it to extract even the most hazardous contaminants from soil and industrial sludge converting much of it into reusable oil and synthetic natural gas that it uses to sustain the process. This methodology offers significant opportunity for greenhouse gas reduction over traditional hazardous waste destruction technologies. The Company's management team maintains expertise in hazardous waste management and contaminated site remediation with experience spanning North America and 15 countries internationally.
